DETAILED ACTION

This Office action is in response to the remarks filed November 5, 2007.

1. The rejection under 35 U.S.C. 112, first paragraph is withdrawn in view of Applicant's arguments.
2. The rejection of the claims under 35 U.S.C., second paragraph as being indefinite and not pointing out and distinctly claiming the subject matter is withdrawn in view of Applicant's arguments.
3. It should be noted that claim 3 should be a dependent of claim 2 and claims 4 should be a dependent of claim 5.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 1-36 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: the nexus between the creation of the biomass coal and the storage of solar energy.
6. Applicant has presented arguments as to the nexus between the creation of biomass coal and the storage of solar energy including definitions and explanations of how plants remove CO₂ from the surrounding air and how absorbed sunlight energy is used to form carbon compounds such as wood. Applicant argues that storage of these carbon compounds represent the storage of solar energy.

The examiner does not dispute the reactions of plant life, water and sunlight. What the examiner does dispute is that Applicant's preamble does not appear to be met by the limitations of the claims. One could say that a car that is sitting in a parking lot wherein the interior heats up to a temperature that is warmer than the exterior temperature may be storing solar energy. The solar energy of the sun heats the cars interior and the heat from the solar energy is stored inside of the car until the door is opened. However, in the present claims, there is no mention in the claims that by storing the biomass coal that solar energy is also being stored. It appears that Applicant is claiming a method for reducing atmospheric CO₂ which may include storing energy. Applicant even states in claim 1 that by storing the biomass coal that atmospheric CO₂ is reduced. The examiner maintains that there is no nexus between the intended purpose and the steps set forth in the claims. For the reasons stated above, Applicant's arguments are not persuasive and the rejection is maintained.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
